

Certified Solar Professional (CSP)

Mode: Online through Zoom

Duration: Six days from 2 PM to 5 PM Daily

Sixth Day: Discussion with Managers Solar Companies and final Test.

Suitable for: All working professionals having no spare time in the day.

Eligibility: Minimum Bachelor in any subject

Course Outline

Module-1 (Solar PV Basics)

Module-2 (Solar PV Components, functions and datasheet reading)

Module-3 (Solar PV System Designing (Off-grid, On-grid and Hybrid))

Module-4 (Solar PV Protection and Quality Standards)

Module-5 (Solar PV performance and Business)

KEY TAKEAWAYS

You will be able to,

1. Understand completely the types of Solar PV systems and how they work.
2. Design solar PV systems from 5KW to 1 MW
3. Understand Protection, Safety, and Quality.
4. Understanding Solar PV system Performance.
5. Understand Solar PV system Business.

BENEFITS OF THIS COURSE

1. You will get employment in a solar company or any industry or Government at any position depending upon education and this training.
2. You can set up your own solar business of Solar PV in the market, operate and sustain it for longer periods.

TRAINERS

1. Engr. Faiz Bhutta Master Trainer and CEO ETRC)
2. Engr. Obaid -ur-Rehman – Assistant Manager ETRC (Moderator of this course)

Contact: Program Coordinator at 03475151222 or email at info@etrc.org.pk

For admission visit at www.etrc.org.pk

National and International certifications both are available for this course.

In Partnership with TRACCERT Canada
